INSTRUCTIONS for INSTALLATION and MAINENANCE "X-RAY VIEWING BOXES"

The viewing box can support RX films with grip rollers in the upper part and plastic clamps on the sides.

INSTALLATION:

- Attach 2 dowels to the wall and apply 2 hook bolts
- Hang the viewing box to the wall using the special key-shaped holes on the back

If you want to fix it to the wall for enhanced security:

- · Attach 2 dowels to the wall
- Remove the plexiglas plate
- Fix the viewing box to the wall with 2 dowels screws through the special key-shaped holes on the back

MAINTENANCE:

The viewing box does not need any particular maintenance.

To clean it use soft cloth and products that do not contain alcohol or solvents

To reach the inner parts, perform the following operations:

- Take off tension to the viewing box
- Unscrew and remove the upper frame, even pulling the corners
- Remove the Plexiglas plate
- To reassemble slide the plexiglas plate, screw on the frame and apply the corners
